

INDUSTRIAL

Transportation Specialists

With today's busy roadways, mitigating risk is why many clients turn to Diversified. Our transportation solutions provide value including safety, increased worker productivity, reduced lost time on the work site, increased worker attraction and retention - this all adds up to huge project savings and timely project completion.

Bringing an Employee Transportation Service to your project is why

employees and workers want to be part of your company, your project and your success.

We offer innovative, cost effective solutions for your transportation needs.

Our commitment is to transporting employees safely home.

Our Core Values

- Safety
- Customer Service
- Resourcefulness
- Integrity
- Positive Attitude
- Teamwork
- Loyalty
- Accountability
- Respect
- Dedication

DTL Milestones

We are proud of the employee transportation services we have provided throughout the building of

Diversified [Prince George] Employee Transportation Services

continue to support the petrochemical, energy and construction sectors by providing safe and reliable transportation of workforces in Alberta and BC.

In the early 1960's Diversified Transportation pioneered the Employee Transportation system during the building of the Sherritt Gordon Plant in Fort

Since introducing employee transportation services we have moved millions of workers safely to a broad range of worksites throughout the Edmonton area, Central Alberta, the Fort McMurray region and northeastern BC.

We work closely with our clients to engineer pre-determined pick up and drop off routes and schedules that make sense and ensure that workers will reach your worksite on time and safely.

At the end of the workday or shift - employees welcome the opportunity to board our vehicles, relax and enjoy the ride safely home while not having to struggle with other industrial traffic and adverse weather conditions.

No project is too big or too small...

the Shell (Scotford Upgrader) near Fort Saskatchewan, Diversified has:

- Transported more than 2 million workers to and from the Scotford Site [2007-2010].
- Successfully completed over 55,500 passenger trips.
- Safely carried these passengers over 10,000,000 km

...that's the equivalent of circling the globe more than 250 times!

Saskatchewan, Alberta. At that time we were convinced that construction and trades workers could be safely transported to major construction sites outside of major cities, effectively.

We were right!

Notable Results...

- 99.10 %** Successful trips without incident
- 99.93 %** Successful trips without passenger complaints
- 99.94 %** Successful trips without public complaints
- 99.88 %** Successful trips without breakdowns
