Re: Extension of HandyDart and Conventional Transit Services - March 21,
2012

The City of Fort St. John would like to thank BC Transit and Diversified Transportation for responding so graciously and promptly to the City's request for extended transit services during the March 21st Rick Hansen Many in Motion event at the Pomeroy Hotel. Having extended hours for conventional transit and the HandyDart service in particular, was of vital importance to many of those who attended.

Your service deserves much credit for making this possible and a special mention to staff that made last minute changes to their schedules and transit routes in order to accommodate this request. The generous donation of labour fees by Diversified Transportation was very much appreciated by the City. The cooperation involved in organizing this event is an example of the excellent working relationship between our organizations.

On behalf of Council, staff and residents thank you to everyone involved who participated in making the memorable appearance of Rick Hansen a special evening for the citizens of Fort St. John.

Sincerely,

Lori Ackerman
Mayor
